# Service Maintenance Contracts

## Guaranteed Service and Repairs

Signode Service Maintenance Contracts are designed to keep your equipment running at maximum efficiency to minimize the costly interruptions and downtime that may result from an unexpected equipment problem.

Service Maintenance Contracts include regularly scheduled visits from a trained Signode technician. Our technician performs a complete inspection and annual overhaul of your machine and makes any necessary adjustments or repairs.

## Cost Savings

Signode Service Maintenance Contracts may cover the cost of parts, labor and travel, which enables you to budget a fixed cost for service and parts over the life of the contract.

This also allows you to reduce the administrative expense of issuing service or replacement part orders.

And, since Signode service technicians carry most repair parts required for our equipment, you can reduce your investment on spare parts inventory.

## Quality Service

Signode has over 80 full-time, fully trained repair technicians with an average of 15 or more years of experience. In most cases, you'll receive your regularly scheduled visits from the same technician, so you have the added value of someone that knows all about your operation, equipment and your service requirements.

Contact your local Signode service representative at 1-800-527-1499 to set up a machine audit and analysis.
