SIGNODE CORONAVIRUS (COVID-19) ACTION PLAN

As the global pandemic of this Coronavirus (COVID-19) outbreak continues to cause significant health concerns for everyone, please know that Signode is prepared to ensure that our products and services will continue to support the supply of products needed by people around the world.

In direct response to the COVID-19 pandemic, we've taken specific actions to ensure the safety of our employees. We implemented travel restrictions and visitor restrictions weeks ago and continue to update our policies as new information becomes available. Additionally, we have taken increased safety measures in our manufacturing facilities to ensure the safety of our employees and our products.

Signode's global supply has been evaluated for any continuity issues and a dedicated team has been assigned to ensure sufficient incoming supplies, with numerous backup supply sources identified. Our Coronavirus Task Teams are monitoring the situation carefully and responding with actions necessary to minimize disruptions and ensure a safe and reliable supply of our products.

We recognize that this is an unprecedented time in our history, but we want to assure you that Signode is taking all reasonable steps to continue the supply of our needed products. We will leverage all aspects of our organization to safeguard the packaging products needed to supply necessary products to affected groups, as well as ensure safe products are available to those in all regions of the world.

Best regards,

Robert H Bourque
President
