

Paper Strap

LEVEX™

**Sustainable Paper Strap
Made by Signode**

Sustainable

Recyclable into paper waste. Paper is 100% FSC certified.

ISB ready

Designed and engineered for optimal outcomes with ISB systems.

Reduce downtime

Can withstand up to 35,000 cycles on ISB machines without any maintenance.

Soft on edges

Corrugated bundles with less indentations.

LEVEX™ Paper Strap For corrugated industry

Levex paper strap is the first of a new generation of strapping solutions developed and produced by Signode. Primarily designed for corrugated industry, Paper Strap is the only alternative to polypropylene able to endure high production output on our ISB automatic strapping machines.

Benefits and features

- Sustainable**
 100% recyclable with premium quality paper from FSC certified sources. Paper Strap is compliant with CEPI and 4evergreen (4EG) standards, allowing the Paper Strap to be recycled like any regular paper waste.
- Reduces Maintenance downtime and costs**
 Large reduction of dust accumulation inside the ISB head, resulting in less maintenance / downtime. We usually recommend a complete cleaning of the head every 10,000 cycles with PP strap. In our internal testings, Paper Strap demonstrated no dust above 35,000 cycles.
- Designed for ISB automatic strapping systems**
 It is easy to replace PP strap with Signode's Paper Strap.

Technical specifications*

Size	5 x 0.45 mm
Break strength	180 N
Coil Length	5700 m
Coil Diameter	385 mm
Core Diameter	150 mm
Surface	Brown, Flat

	Paper Strap	Polypropylene Strap
Raw Material	FSC Certified Paper, PP	Polypropylene
Recyclability	100%, CEPI / 4EG	100%, Lower grade PP
Virgin Plastic Tax	Not applicable	Applicable

Designed for optimal machinability on ISB systems
